

AN ISO 9001: 2015 CERTIFIED COMPANY

MEGA ROOF

QUALITY ROOFING WITH SUPERIOR STRENGTH

ABOUT US

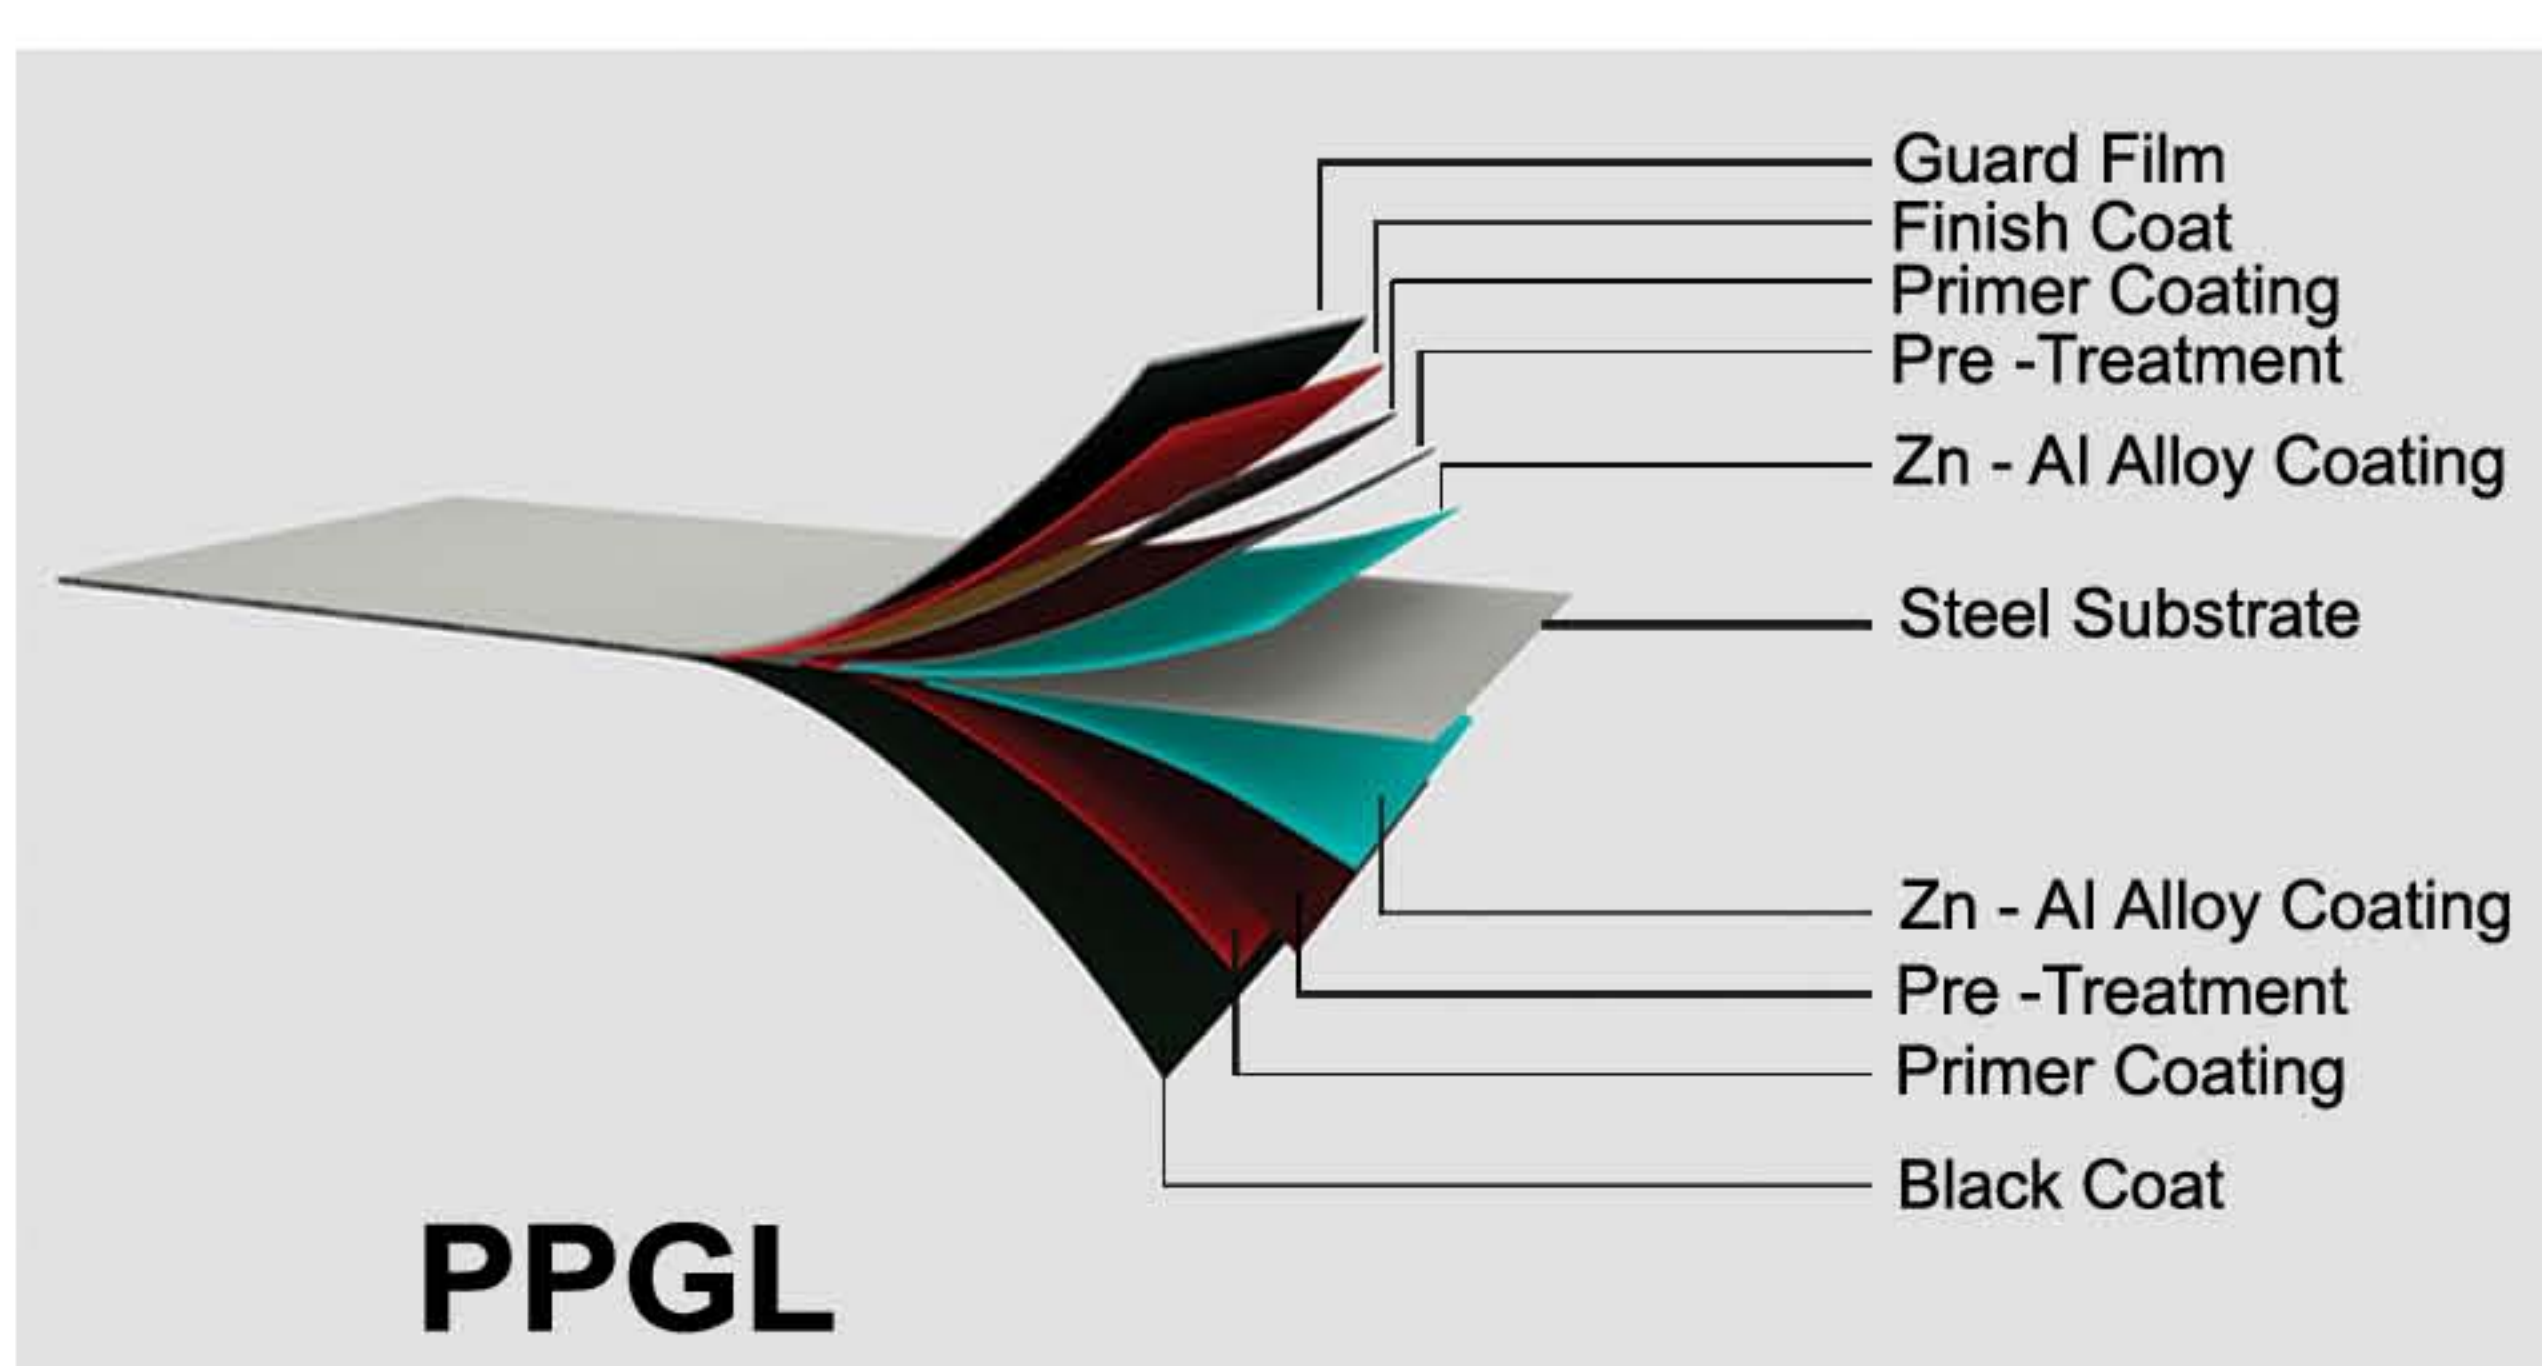

Our product profile consists of Colour Coated Profile Sheets and Aluminium & Zinc Coated Sheets that have the 3 Rib feature, which enhances the strength of the profile and is also the first of its kind in the region. The raw materials used in manufacturing the roofing sheets are one of the best available in the market.

Mega roof also provides customized colour roofing sheets on bulk orders. Even in its bare and pre-painted state, the sheet finds extensive application in areas where corrosion resistance, high temperature resistance, good heat reflectivity, greater flexibility, excellent formability and long lasting abilities are required. Mega Roof Colour Coated Sheets come in different colours while ensuring its high tolerance and high strength.

WHY MEGA ROOF COLOUR ROOFING

Mega Roof Colour roofing has a multi-layered structure that makes them long lasting even in a region like North-East where zinc coated roofing sheets gets easily rusted due to moisture content in the air. The multi-layered structure makes them long lasting with an exhibition of high quality and colour brilliance. It is one of the emerging roofing companies in North East to have state of the art manufacturing plants that has aesthetic roofing & cladding applications, easy installation, attractive looks and durability to be extremely useful.

The uses of colour roofing sheets can bring down the cost of roofing in long term if compared with general zinc coated sheet which is beneficial for the end user. To cater to the needs of consumers, Mega Roof has come up with new 3 RIB Design technology which can give more strength as compared to normal colour roofing sheets available in the market.

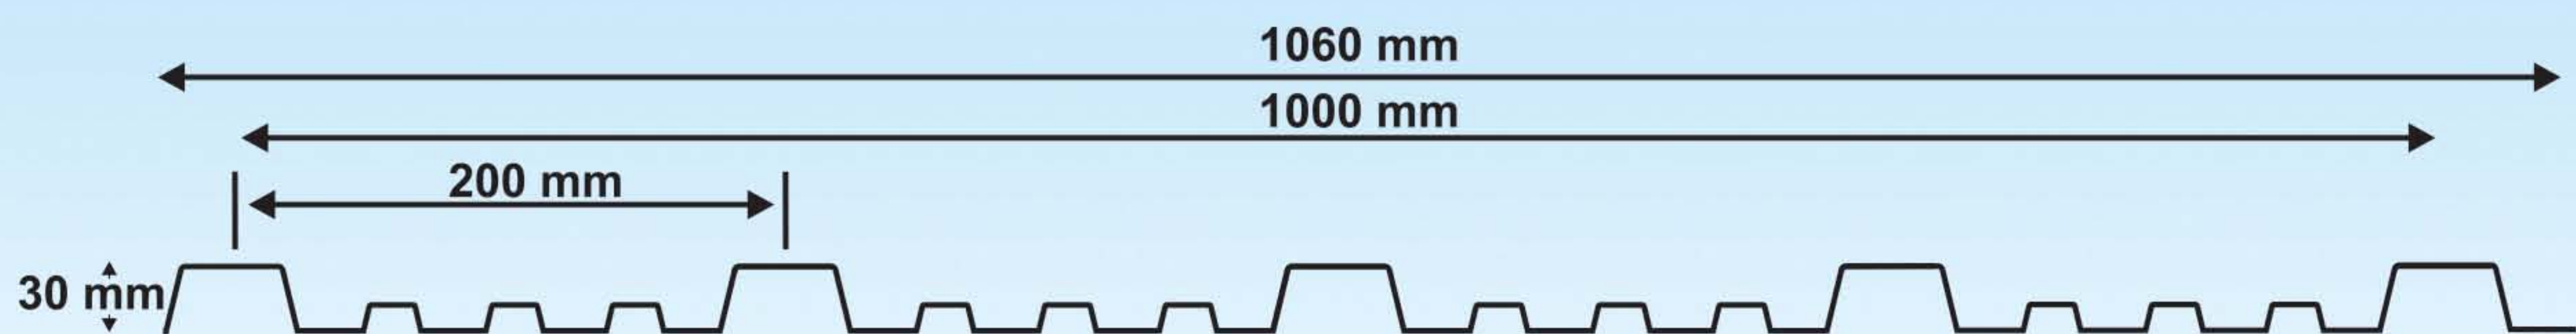

MEGA ROOF

PRODUCT FEATURES

Mega Roof sheets has an overall width of 1060 mm, a sheet length of up to 30ft and a steel base of 340-550 mpa, which are aesthetic and adds strength to the roofs and wall claddings. The high performance paints used in the colouring of roofing sheets protect the roof from UV rays, making the colours last longer than the usual zinc-coated roofs. Special chemical treatment used while manufacturing gives Mega Roof its remarkable water repellent, anti-fading and cooling properties. The specially designed 3 ribs act as anti-capillary grooves which makes the sheet leak proof and the extra ribbed design makes Mega Roof extra strong to face all climatic and utilitarian challenges. Apart from all its remarkable features Mega Roof also provides Quick and Easy installation.
